NEXUS GLOBAL MANUFACTURING CORP.

Annual Production Performance Report — FY2025

Executive Summary: Fiscal Year 2025 marked a historic turning point in operational efficiency across all manufacturing facilities. Through coordinated capital investments in predictive machine telemetry, automated optical inspection, and robotic cell integration, production efficiency achieved consistent quarterly acceleration.

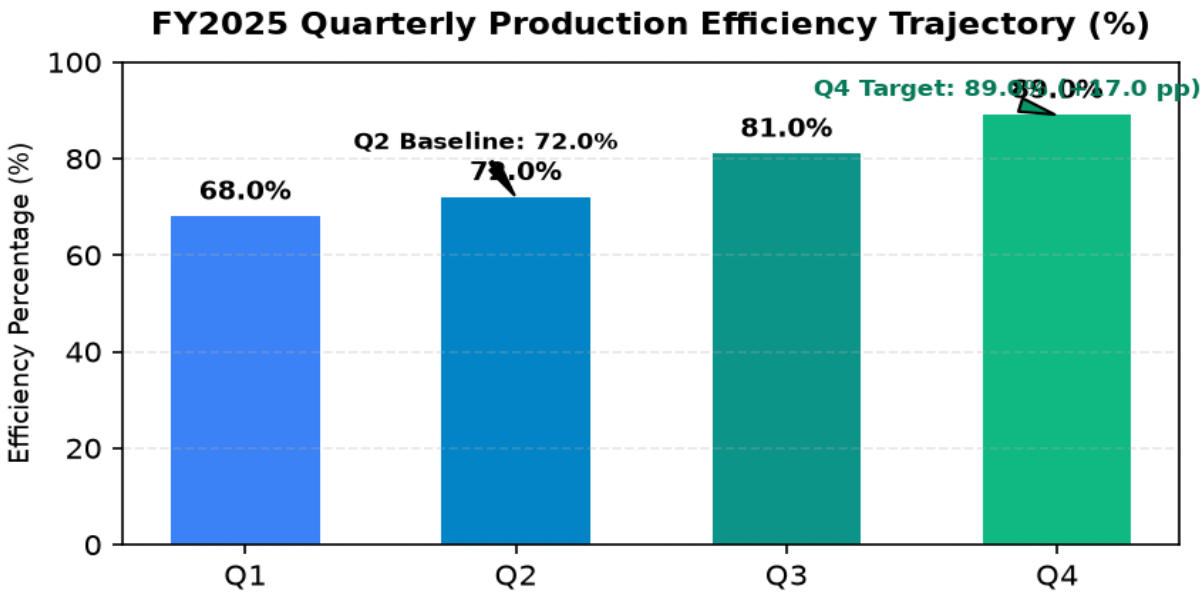

Figure 1.1: Production Efficiency Bar Chart — Quarterly Trajectory (Q1 to Q4).

Quarter	Total Output (Units)	Production Efficiency (%)	Defect Rate (%)	Operating Margin
Q1	242,500	68.0%	9.4%	14.2%
Q2	265,100	72.0%	8.7%	16.8%
Q3	308,400	81.0%	4.9%	21.5%
Q4	354,200	89.0%	2.1%	27.4%

Key Finding: Between Q2 and Q4, production efficiency escalated from 72.0% to 89.0%, representing an absolute increase of 17.0 percentage points (+23.61% relative growth rate). This milestone surpassed the annual operational target by 4.5 percentage points.
